ABOUT US

HFP Group, a licence Agency of Maharashtra fire Services (Govt.) Mumbai Maharashtra based business entity, establishing new standards of excellence by catering to variety of industrial sectors. The company's involved business is to manufacture, supply, and export firefighting products such as fire extinguishers, hydrant accessories, sprinkler accessories, fire alarm accessories, and fire suppression system accessories. In addition, the company also specializes in the supply, installation, testing, commissioning, and AMC of fire hydrant systems, fire sprinkler systems, fire alarm and detection systems, and fire suppression systems. The products are also 'ISI' and 'CE', marked, which further indicates the authenticity of the products and our credibility.

The organization has established itself as a trustworthy Fire Protection Equipment Manufacturer and System Contractor by adopting ethical business practices. By providing quality products and prompt services and meeting the requirements of sectors such as **Medical, Chemical, Engineering, Oil & Drilling, IT, Automotive, Pharmaceutical, Construction, Shipping, Hotel Industry, etc.**, the company has acquired a large clientele across India and abroad.

Our Goal

Delivering customer satisfaction through professional competence.

Vision

To be a prominent player in our country's development and infrastructure expansion. Establish a global presence through strategic alliances and joint ventures with global leaders.

Group

- Established in 2004 by Mr. Pramod Mohandas
- An **ISO 9001-2015** certified Mumbai-based firm with a strength of **200+** employees working at various sites all over India, covering 9 states with a major strength in Maharashtra, Karnataka, Kerala, Assam etc.
- International exposure and execution experience in nations such as Africa, Bangladesh, and Nepal
- Exclusive skills in executing fast track projects from design to commissioning, as well as after-sales service during the defect liability period, and with a primary focus on value engineering in products, processes, service, design validation, proof checking, and other areas.
- Successfully commissioned **1000+** projects in India and abroad.
- Accredited by **"A" grade Certification** in all categories for firefighting systems (Protection, Detection, and Passive System) by the Government of Maharashtra (Directorate of Maharashtra Fire Services).

PRAMOD MOHANDAS Managing Director

Shri Pramod Mohandas, is the **Managing Director (MD)** on the Board of **HFP group** since November 2004. He holds a Bachelor of commerce degree from Calicut University, Kerala, He has rich and varied experience of more than **20 years** in Fire engineering & Manufacturing Sector. Under his guidance and leadership HFP group has excelled in all fields and surpassed all its previous targets and performance. He has worked more than **1000+** project in India and Abroad where **HFP group** was responsible for designing, supply, installation, testing & commissioning of fire protection, Fire detection & public addressable system.

VIHANG PHATAK Executive Director

With an M.Tech in Structural Analysis and a strong background in **Civil Engineering**, in-depth hands-on involvement on L&T's prestigious Coastal Road Project. He has played a pivotal role in the successful completion and effective implementation of various projects at **HFP**. As an Executive Director of the **HFP Group**, he is dedicated to driving growth through innovation and strategic vision, ensuring a technologically advanced and sustainable future for the company.

NIMESH RANE Sales Director

With over **13 years** of experience in the automobile industry as a General Manager, I have developed strong leadership skills, strategic planning expertise, and a deep understanding of operational management. **Since 2021**, I've been with **HFP Group** as a Sales Director, leveraging my technical knowledge and industry contacts to drive sales growth, foster lasting client relationships, and consistently exceed targets.

OM ANCHALKAR Factory Operations Director

With a background of commerce, He holds a **Bachelor of Commerce degree** with specialisation in **IT** from Mumbai University , He is the youngest director in our firm who handles all day-to-day operations in our Manufacturing company and also is the incharge of our Manufacturing Unit. With his young mindset and views he has contributed to strengthening the supply chain of our manufacturing unit as well as integrating factory operations with various **IT platforms**. Furthermore, his vision is to make our company grow by setting up Autonomous Manufacturing unit and Integrating all company operating with AI which will strengthen company's core to a greater extent.

NILESH MAHADIK Operations Director

With over 16 years of experience in Customs **Import-Export Clearing**, Mr. Nilesh Mahadik ventured into the construction industry by founding Pranil Construction in 2015, which continues to thrive. His association with **HFP Group** began in 2017, where, under his leadership, the company has strengthened its position as a leading fire contractor service provider in Maharashtra. He has been instrumental in driving the company's diversification into fire safety projects, solidifying its reputation for excellence and innovation.

SUSMIT CHOUDHARI Finance Director

With a B.Com, MBA in Finance, and **FRM (GARP)** certification, has extensive experience in financial management and risk assessment. He began his career as an Equity Research Analyst at Transparent Value, a U.S.-based hedge fund, before joining his family business in 2010, where he manages finances and asset portfolios. In 2011, he founded Excellink Finservices Pvt. Ltd., providing financial solutions to corporate and retail clients, including **risk management, tax advisory, and financial liaison services**. leads both companies with a commitment to delivering strategic, client-focused financial solutions.

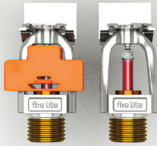

GULAB BHUSE Factory Operations Director

An Arts graduate with an MBA in supply chain & Import Export management, and a **diploma (DIEM)** from Mumbai's Welingkar Institute of Management Development and Research, has **27 years** of experience **managing imports and exports** in companies such as textile and steel. Furthermore, he has extensive experience in banking, customs, and foreign trade policy. He has worked with several government entities, including Texprocil, the Textile Committee, the Chamber of Commerce, and the Foreign Consulate.

We Covered

MANUFACTURING

The most reputable manufacturing company in India is **HINDUSTAN FIRE PROTECTION. PVT. LTD.**, and **FIRELITE** is a brand that sells a wide variety of fire extinguishers, including ABC Dry Powder Fire Extinguishers, Clean Agent-based Fire Extinguishers, Carbon Dioxide-based Fire Extinguishers, Water-Based Fire Extinguishers, Water mist-Based Fire Extinguishers, Mechanical Foam (AFFF) Fire Extinguishers, Ceiling Mounted Modular Suppression Systems, Specialized Fire Extinguishers, Fire Sprinkler, Fire Alarm, and Fire Suppression System Accessories.

Firelite's range of fire extinguishers and firefighting equipment are suitable for commercial and industrial applications, as well as home and car fire safety. FIRELITE Fire Extinguishers & Fire Fighting Equipment are highly suitable for fire safety in offices, factories and warehouses, server rooms, hotels and restaurants, kitchens, schools, and residential & Commercial buildings, among other things. FIRELITE's range of fire fighting equipment is more powerful and efficient than any other on the market today. These extinguishers are made in our cutting-edge facility and go through various stages of quality control. Eventually, every **FIRELITE FIRE FIGHTING EQUIPMENT** will have **ISI, ISO 9001**, and **CE** certifications.

TURNKEY PROJECTS

I. GAS BASED SYSTEMS

- A. Clean Agent Fire Suppression System In addition to fire detection and alarm systems, organizations that have a dedicated server/rack rooms should have minimum gas suppression systems. The different types of gas suppression systems available are **CO₂**, **FM 200**, **Novec 1230** and **Water Mist**.

II. WATER-BASED FIRE FIGHTING SYSTEMS

- A. Fire Hydrant System Wall hydrants and external hydrants are merely the visible end of a reliable extinguishing water supply that can be manually extinguished by fire departments, operator personnel, or building inhabitants. They are visible extensions of dependable water supply components intended to match local conditions, such as pump systems, subterranean pipework, and filling and drainage stations. These components assure a steady supply of safe hydrants.
- B. Fire Sprinkler System. Sprinkler systems detect and notify fires, and they automatically commence the water extinguishing procedure. The underlying notion of selective extinguishment renders them exceedingly effective. In the event of a fire, only sprinklers in the immediate vicinity of the fire are triggered. The fire is extinguished immediately with water, but the remaining sprinklers stay closed. Sprinkler systems offer dependable fire protection for buildings and industrial facilities. To boost the extinguishing effect against specific fire threats, a film-forming foaming agent can be added to the extinguishing water.

III. FIRE ALARM & DETECTION

The first step toward safety is the timely recognition of threats. Our highly advanced detection systems and other equipment respond instantly, saving valuable time for safety precautions and corrective action. This provides you time to psychologically prepare, but it also allows our suppression mechanisms to respond almost immediately.

A. Intelligent Addressable

Intelligent Addressable Systems offer benefits in terms of speed of detection, identification of the location of fire and easier maintenance. These systems also offer high tolerance towards faults in wiring – single pair of wires can be used to connect over 200 devices to a single system. This method offers cost savings when large systems are used. This system works for you round the clock. Various sensors like motion detection, glass break, and door contacts are installed in your premises. These sensors detect any disturbances and send a signal to our 24hrs Control Room.

B. Conventional

Conventional fire alarm systems provide the earliest possible fire detection and warning. This system consists of smoke & heat detectors placed strategically. They smell smoke & heat at the earliest stages of a fire.

ANNUAL MAINTENANCE CONTRACT & FIRE COMPLIANCE

NON-COMPREHENSIVE AMC

When the client enters into this AMC, our well qualified Service Engineers' will carry out the Preventive Maintenance Services (PMS) based on the agreed terms of periodicity. Ideally, it's done every 3 months unless there is a change in the policy of the client to have it at different intervals. It may be once a month or once in 4 months etc. Based on the increased/decreased periodicity, the value of the contract will increase/decrease

Most of the time, these periodic preventative services are pre-planned and coordinated with our clients.

Aside from preventative services, this contract includes complaint calls at no additional cost. However, spares and consumables are charged at the current prices.

COMPREHENSIVE AMC

Preventive Periodic Services (PPS) will be similar to non-comprehensive AMC. However, with Comprehensive AMC, even spare parts are covered, but consumables are charged depending on current rates.

Most of the time, these preventive periodic treatments are scheduled in advance and in collaboration with our clients.

In addition to preventive services, this contract includes free complaint calls.

FIRE COMPLIANCE

According to the Maharashtra Fire Prevention and Life Safety Measures Act of 2006, the owner or occupier must provide the Chief Fire Officer with a certificate issued by a Licenced Agency stating that the building's fire prevention and safety measures are in compliance twice a year, in January and July. And **HFP Group**, as a licensed agency of Maharashtra Fire Services, handles all of your fire compliance with AMC contact.

FREE FIRE MOCK DRILL ALONG WITH AMC

Many places spend a lot of money on different types of fire protection equipment. However, when there is a fire, many people die. Sometimes systems fail, and many staff are not taught on how to effectively evacuate.

People lose their lives primarily because they don't know what to do or where they should go. The evacuation drills cover the details of what to do and where to go. **HFP Group** began a free mock drill twice a year as part of our AMC contract.
